

SINGULAIR®

MODEL 210P CONTROL CENTER

THE SINGULAIR MODEL 210P CONTROL CENTER MAKES SYSTEM OPERATION SIMPLE AND AFFORDABLE

The Singulair Model 210P control center keeps it simple! If your onsite installation doesn't require remote monitoring, auxiliary input or total nitrogen treatment, the 210P is the perfect fit. Every Singulair aerator can now be installed with this factory pre-programmed control center equipped with time clock control, alarm light, audible alarm, reset button and power switch. All electrical controls are combined into one NEMA rated, UL listed, weatherproof enclosure.

The new 210P control center and 210P inserts can also be used to retrofit or replace any Singulair system not requiring remote monitoring or additional treatment processes.

EVERY
SINGULAIR
MODEL 210P
